

WFUMB Five-year Strategic Plan 2024-2028

Aim: to encourage education in the field of ultrasound, to promote international cooperation and to bring sustainable ultrasound services to the underserved areas of the world to improve global healthcare

Objectives

EDUCATION

- Supporting the next generation of ultrasound users
- Integrating ultrasound into undergraduate education
- Extending eLearning, promoting WFUMB's free ultrasound eBook
- Delivering webinars on topical issues
- Regular safety updates

COMMUNICATION / PUBLICATION

- Improving the impact of WFUMB's journal Ultrasound in Medicine & Biology
- Promoting WFUMB Ultrasound Open Access journal
- Delivering Guidelines and Position Statements
- Continually improving the website and connecting ultrasound users
- Ensuring quality of WFUMB Congresses in 2025 and 2027

OUTREACH

- Supporting existing and developing new Centres of Education (CoE) in areas where the need is greatest and evaluating the impact of the training
- Increasing access to handheld Ultrasound devices in resource limited areas
- Trialing mobile COE's on all continents
- Working with Ultrasound partners to deliver sustainable quality education

COLLABORATION

- Increasing collaboration with Industry in promoting new technologies
- Working with our Federations to harmonise guidelines and recommendations
- Expanding coverage to include North America

Values and Philosophy

Ultrasound plays an essential role in diagnosis and treatment for nearly all specialties. All patients who might benefit should have this available, delivered safely and skillfully. WFUMB is committed to the highest ethical and professional standards of governance and using its resources for the greatest benefit.
